

ASTHMA · RECRUITING

MERIDIAN-2 — Biologic for severe eosinophilic asthma

A 52-week study of an investigational injectable biologic for adults with severe asthma uncontrolled on inhaled therapy.

About the study

MERIDIAN-2 is evaluating an investigational injectable biologic for adults with severe asthma whose symptoms persist despite high-dose inhaled corticosteroids. The study runs approximately one year with monthly visits.

Who can participate

You may be eligible if you:

Are 18–75 years old

Have a diagnosis of asthma

Are currently on a daily controller inhaler

Have had at least one asthma flare in the last year requiring oral steroids

What to expect

Monthly study visits over 52 weeks

Investigational study drug provided at no cost

Compensation for time and travel
